

Take Control of Your Implant and Bill-Only Processes

Deliver what your surgeons need, when they need it – with no manual tasks and instant visibility into loaner tray inventory

Less Paperwork. More Time for Patient Care.

Implant and bill-only processes are the hidden opportunity for hospitals to increase operational efficiency and increase profitability. Imagine a solution where:

- Devices, trays, and supplier representatives arrive on schedule for every operation
- Product usage synchronizes automatically from the EMR to Surgery Exchange
- OR managers gain the flexibility to assign staff for patient care and other essential tasks because there's no need for manual workflow
- Implant usage capture fully and accurately covers one-time use items
- All bill-only implants price automatically in compliance with hospital supplier contracts
- Seamless bill-only implant management even covers add-on and trauma cases

That's Surgery Exchange.

We connect all stakeholders across the implant surgery lifecycle through process improvement services and Cloud-based technology that puts perioperative and supply chain managers in control of implant and bill-only processes. Our customers save time and money by eliminating off-contract spend and freeing staff from manual bill-only tasks.

Built Specifically for Perioperative Needs

Surgery Exchange is the first and only comprehensive implant and bill-only process improvement solution that removes perioperative managers' most significant operational and financial challenges. Our solutions automate documented notification processes to ensure the correct devices, trays, and supplier representatives are on hand for surgeries.

Surgery Exchange automatically synchronizes with EMR to capture product usage fully and transfer the reconciliation burden from OR staff to the supplier representative. Pre-surgery product demand planning and loaner tray identification provides visibility for the OR and sterile processing departments that reduces overtime and expedited shipping expenses.

Proven Process Improvement and Flexible Cloud-Based Services Delivery

Surgery Exchange replaces disconnected and repetitive manual tasks across multiple hospital operational areas with strategic automated process improvements for supply chain, OR operations, and finance. This unique approach combines process improvement with technology to improve implant and bill-only processes and internal operational coordination across the organization.

Surgery Exchange Platform – A comprehensive pre- and post-surgery implant and bill-only solution covering scheduling, notification, demand planning, EMR/EHR integration, contract compliance, and PO generation

Surgery Exchange Express – A great introduction to Surgery Exchange's many benefits by automating contract compliance, price usage, and PO generation

Surgery Exchange Logistics – Comprehensive perpetual inventory control for owned and consigned implants including forecasting, ordering, and obsolescence management

Why Customers and Industry Experts Rave About Surgery Exchange

The industry's only end-to-end solution, from scheduling through PO generation, combining process improvement and innovative technology to unify and streamline implant and bill-only processes across the organization

Rapid hard-dollar ROI by eliminating manual tasks and identifying hidden implant and bill-only expenses

Automated contract enforcement that ensures pricing and product usage compliance with current hospital supplier contracts
