

# Transforming PPI Management for Financial Health

## The Challenge

In today's challenging healthcare environment, managing physician preference items (PPI) efficiently is critical to your organization's financial health. High-cost surgical implants significantly impact both clinical outcomes and your bottom line.

### Our Solution

Surgery Exchange provides a comprehensive platform that revolutionizes PPI management through automation, data visibility, and streamlined workflows - delivering improved operating margins and operational improvements.

### Improve Margins

Our platform addresses the entire PPI lifecycle to maximize financial performance through three key areas: enhanced revenue management, complete contract compliance, and streamlined operational efficiency. Together, these capabilities deliver measurable improvements to your bottom line.

### Enhance Revenue Cycle Management

- 100% PPI Cost Capture - Eliminate revenue leakage with complete documentation
- 100% Contract Compliance - Ensure all purchases align with negotiated pricing
- Speed to Patient Billing - Submit charges more quickly and completely

### Deliver 100% Contract Compliance

- Real-Time Off-Contract Capture - Identify non-compliant implants immediately
- Elimination of PPI Overspend - Pay only contract price
- Reduced Labor Costs - Eliminate wasteful manual steps/tasks for bill-only cases through automation

### Drive Operational Efficiency

- Seamless Integration - Smooth interface with your EMR and ERP systems
- Automated Accurate Documentation - Free staff from manual data entry
- Scalable Platform - Support growing procedure volumes without adding staff

# Transforming PPI Management for Financial Health

## Stakeholder Benefits

### Stakeholder | Key

- **CFO** - Margin expansion by eliminating revenue leakage, delivering full contract compliance and eliminating wasteful manual workflow
- **PeriOp** - Save valuable time through automated workflows and seamless data capture
- **Supply Chain** - Gain complete visibility and control over vendors and implants

## The Bottom Line

Surgery Exchange requires minimal IT resources and typically delivers in excess of 10 x ROI within the first 12 months. With rapid implementation and an intuitive interface, your team can quickly begin realizing the benefits of optimized PPI management.
